

For the December 5, 2020 COVID-19 positive test report, we have one new Nursing Facility staff member positive for COVID-19 and we have not had three or more residents or staff with new onset of respiratory symptoms occurring within 72 hours of each other. Through contact tracing we have determined that this staff member did not have prolonged close contact with any residents during their probable infectious period. When this employee developed symptoms, they did not enter our building at the start of their shift and was COVID-19 tested in their car and sent home to quarantine.

Therefore, cumulatively to date since March 2020 we have a total of:

Classification of person:	Nursing Facility Staff	Personal Care Home Staff	Healthcare partners	Nursing Facility Residents	Personal Care Home Residents
Number that tested positive for COVID-19:	25	13	1	21	28

We continue to take the necessary infection prevention and control measures to limit potential exposures which includes, but is not limited to, contact tracing, testing the residents and staff, creating cohorting zones and wearing appropriate Personal Protective Equipment as per the Pennsylvania Department of Health and Centers for Medicare and Medicaid Services guidance.
